

Soap Free Procyon® Extreme! Carpet Cleaner Concentrate:

WHEN TESTING YOUR SAMPLE OF SOAP FREE PROCYON EXTREME! CARPET CLEANER CONCENTRATE, PLEASE READ HELPFUL HINTS BELOW.

When it comes to restoring a carpet, **Soap Free Procyon® Extreme! is a wonderful product that you can count on to get the toughest job done!** Even if you have new carpet and it is time for them to be cleaned “do not use soap!” It will leave a sticky residue. Some will say, “We rinse the soap out”. Yes, you think you might be rinsing the soap out, but you cannot get the entire soapy, sticky, detergent residue out of a carpet.

Think of the washing machine. A washing machine goes through 3 rinse cycles just to get the soap out of your clothes. If you stop and think about that for a moment, that is a lot of water. Three rinse cycles just to get the detergent out of your clothes!

Now think about rinsing the detergent out of your carpet. How much water do you use to rinse the soap out of the carpet? If you used the same amount of water to get the soap out of your carpet as your washing machine uses to get the detergent out of your clothes, you will have some wet carpet, mold, mildew and indoor air quality issues. Plus it would take days for your cleaning job to dry. Wet carpets cause mold, mildew and bacteria and we know that this is not a safe and healthy choice.

Helpful Carpet Hints:

Soap free Procyon Extreme! can be used with all types of cleaning equipment from truck mounts, portable extractors and low moisture cleaning systems. Try our cleaning product as a pre spray in front of any piece of cleaning system and you will love your results.

Wicking, Browning Problem Carpets: Solving wicking, browning using **Soap Free Procyon Extreme!** as a pre-spray will dissolve the detergent residue and soil from the carpet fiber leaving the tips of the fiber all natural and soap free. The next step you will want to take is fresh water extract to start the removal of the soil and detergent residue from the fiber leaving the fiber soap free. Then you need to use our special thick 100% all natural cotton bonnet covering 300 square feet per side to... almost dry the tips of the fiber. So when the wicking process can not start, the moisture cannot rise back to the tips of the fiber. **Why:** Once you have removed the detergent from the fiber, the tips of the fiber will be free of the soap. You can now run our cotton bonnet across the fiber removing the moisture and almost dry the tips. This method will stop your wicking problem.

Extreme Problem Carpet: Solving wicking problems for some carpet can present a challenge. “Caution: you may not want to extract because any amount of moisture could cause over wetting.” First you can pre-spray to dissolve the soil and detergent residue from the tips of the fiber. Use a special 100% all natural cotton bonnet to almost dry the tips of the fiber. This process can stop wicking.

In extreme cases where you cannot pre-spray or extract, you will want to use our special 100% all natural cotton bonnet using **Soap Free Procyon Extreme!** in a mop bucket with a wringer. Dip your 100 % cotton bonnet in to the mixed solution wring out the bonnet pad and place the cotton pad on top of the dry carpet in an area away from the wicking problem. Place your buffer on top of the wet bonnet and spin it out moving the bonnet across the soiled area removing the soil, cleaning the area. Keep the bonnet moving do not stop until you are ready to flip the bonnet or stop the cleaning. Always stop your cleaning system in an out of the way area that wicking has not occurred.

In some cases: a bonnet cannot be used to remove moisture from the tips of the fiber. Using **Soap Free Procyon Extreme!**, extract the carpet fiber removing the soap with out over wetting...dry extract and remove all the moisture from the fiber that you can. **Next:** use drying machines to dry the problem area fast is the key to your success.

We have been teaching our soap free, odor free cleaning process for over 30 years and it does work. We are proud to offer our cleaning product line that has more certifications and testing over the past 30 years than any cleaning product of its kind.
